Professional Experience

Wild Endeavour Incorporated

March 2010 – Present

Chief Technology Officer

- Company co-founder providing software development consulting, training and coaching services.
- Developed and delivered C# Programming From Scratch course.
- Acted as team lead and application architect for a WPF application and a five developer team.

Interactive Intelligence Incorporated

July 2009 – March 2010

Senior Software Developer

Contributed to a large winforms client for an enterprise VOIP telephony system.

Independent Consultant

February 2008 – July 2009

Software Artisan

Worked on a series of contracts for clients in a variety of domains.

VisionPace – Kansas City, MO

Developed a web service API for credit card processing using custom headers for authentication and a SQL Server backend.

Alcoa – Knoxville, TN

Developed a business intelligence application for the corporate intranet using ASP.NET with an Oracle database accessed through stored procedures. Managed migration of the development platform for all applications from Visual Studio 2003 / .NET 1.1 to Visual Studio 2008 / .NET 3.5.

Intellection Group – Atlanta, GA

Integrated a classic ASP application into an existing Macromedia Director application through the Internet Explorer ActiveX control. Built SQL Server English Query model for a law-enforcement database.

QuotePro – Chicago, IL

Reorganized and cleaned up the source tree of a Visual FoxPro application and imported it to Subversion for version control.

Reinarz & Associates – Edwards, CO

Extended an existing website built with SQL Server and ASP.NET for an international law firm. Implemented dynamic data filtering in the administrative interface using Telerik RAD controls. Responsible for all aspects of feature implementation from writing SQL queries to page layout using CSS.

DPRA Incorporated

June 2005 – January 2008

Defense Application Developer

Contributed to the development of JFAST, a defense logistics application, with a team of 15 developers. Enhanced corporate collaboration and productivity using Team Foundation Server (TFS). Drove the adoption of TFS across contracts through briefings, training and requirements gathering. Extended Team foundation server events with custom web services. Customized TFS Project and work item templates. Built a custom TFS Version control client for Visual FoxPro.

Young & Mead Consulting, LLC

January 2002 – March 2005

Software Developer & Consultant

Worked with a team of four Visual FoxPro developers and two system administrators developing and supporting custom business applications. Supervised other team members when they worked on my client's projects. Responsible for all aspects of managing client relationships.
